

Wireframe: <https://app.moqups.com/dQM3Qk3NVj/view/page/ad64222d5?ui=0>

Note 1: This wireframe is best used by following the sequence of actions detailed in the user tests, as these are guaranteed to result in the correct behavior. Due to limitations of wire-framing, I could not reasonably encode all of the state in a way that the wireframe can take any arbitrary combination of interactive operations.

Note 2: Rather than using arrows for flow, please use Moqup's "hotspots" function (by holding shift) to understand the mockup's flow and possible actions you can take.
